Employee Role : Developer Java FullStack Angular-L1 / Band: TEAMRBOW(B1)

CAREER OBJECTIVE

"Seeking a challenging developer or technical role where I can leverage my expertise in Java, SQL, and full-stack development to design scalable applications, optimize databases, and contribute to innovative business solutions."

EDUCATION

BE (Mechatronics Engineering)

Agni College of Technology, Chennai, India

(2018- 2022)

CGPA: 8.14

PROFESSIONAL EXPERIENCE

Wipro | Project Engineer

(October 2024 – Present)

Project 1: Department of Treasuries and Accounts (Government of Tamilnadu)

- Working on a project primarily based on Oracle Java, managing government staff's basic profiles, Transfer and Relieving processes, and employee salary information from joining to retirement.
- Handling the Government of Tamil Nadu's financial operations, including salary disbursement and budget management.
- Managing Central Government budgets and financial transactions for the Tamil Nadu Finance Department.
- Providing L1 support, resolving tickets raised by clients, and assisting end-users with Wipro's application.
- Addressing escalated issues from client locations and coordinating with Wipro's project team and senior officials

SIFY TECHNOLOGIES LIMITED, Tidel park Chennai

(Associate - Application support engineer)

(October 2022 – October 2023)

- Managed relationships with 8 clients at Sify Technologies, including Adani, BPCL, Wildcraft, ITC, DBPL, ITC-ESPB, and Tide Water, ensuring exceptional service delivery and client satisfaction.
- Managed SQL database-driven applications, ensuring efficient query execution, database troubleshooting, and optimization of data retrieval processes.
- Performed database performance tuning, writing optimized SQL queries to enhance application efficiency and support pan-India client operations.
- Applied SQL query optimization techniques to improve system performance, reduce query execution time, and enhance overall user experience.
- Proficient in ServiceNow ticketing tools, leveraging advanced knowledge of the ServiceNow portal to enhance issue resolution and improve client communication.
